### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Applicant has claimed uniquely distinct features in the instant invention which are not found in the prior art, either singularly or in combination.

According to the invention, a device comprises a storage location for storing a GUID, wherein the device is configured to provide the GUID to a master in the computer system during a trusted setup, and wherein the device is further configured to provide at least an indication of the GUID during a data transaction. Further, receiving a request for a data transaction, transmitting data in the data transaction and at least an indication of the GUID in the data transaction and authenticating the data using at least the indication of the GUID in the data transaction. In another embodiment, providing a GUID to a master device during a trusted setup, setting an introduced bit during the trusted setup, receiving a data transaction request and refusing the data transaction request once the introduced bit is set unless at least an indication of the GUID is provided in the data transaction request. In a further embodiment there is a first device, including a first timer and first logic coupled to the first timer; a second device including a second timer and second logic coupled to the second timer, wherein the second device also includes a first security authenticator configured to authenticate the first device, wherein the first security authenticator is further configured to provide at least an indication to the first logic that the first timer is to be reset to a first predetermined value in response to authenticating the first device and a second security authenticator configured to authenticate the second device, wherein the second security authenticator is further configured to provide at least an indication to the
